

Extend the Power of Your Portal with Real-time Collaboration

CollabraSpace creates new technologies that provide customers with a powerful, secure, real-time, open standards collaboration solution, CollabraSuite™. The powerful CollabraSuite platform to enables enterprises to realize the power of Collaboration Without Boundaries.

CollabraSuite™

CollabraSuite software presents a metaphorical representation of a physical workplace. The collaborative environment is made up of campuses, buildings, floors and rooms that can communicate seamlessly over distributed systems. CollabraSuite offers a total collaboration solution, providing organizations with the capability to embed a powerful set of collaboration tools that link at literally every point of their enterprise.

Delivering Flexibility

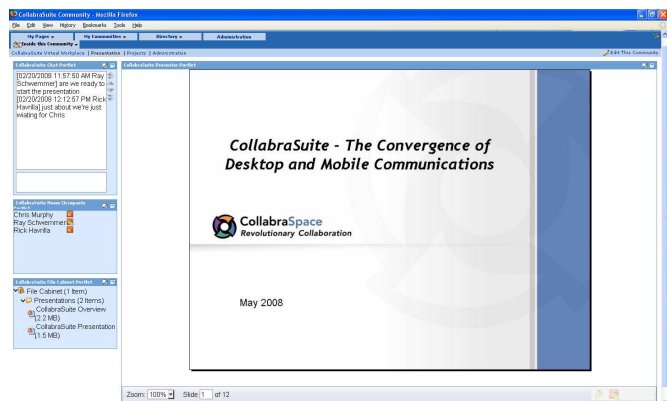

CollabraSuite provides a flexible, dynamic and secure platform that can grow with your needs over time. And its open API means you can easily integrate your applications, tailoring the collaborative environment to meet your organization's specific needs.

CollabraSuite offers a rich set of components, including:

- Presence Awareness
- Instant Messaging/Paging
- Shared Whiteboard
- Access Controls
- Auditing and Metrics
- Document Storage and Retrieval
- Audio/Video Conferencing
- Profile Manager
- Navigation
- Desktop Sharing
- MS PowerPoint Presentation
- Associates List

A Smarter Architecture

Open, standards-based application architecture built on the industry-leading J2EE platform, leveraging its security model for authentication and authorization. CollabraSuite ships with JSR-168 compliant portlets providing a standard integration strategy with leading portal vendors.

Collaboration Without Boundaries

Advanced solutions that integrate people, data & processes within a single, seamless collaborative environment
