Known Limitations

There are some known limitations regarding specific combinations of software components within CollabraSuite. Due to inconsistencies in third party products, the following limitations exist:

WebLogic Application Server

- CollabraSuite requires an updated version of the SAAJ libraries for WebLogic 10.0. The jar files are located in the `CollabraSuite/WebLogic/lib` directory and must manually be placed in the `<WL_HOME>/<JRE_DIR>/lib/endorsed` directory.

WebCenter Interaction (ALUI)

- The CollabraSuiteALUI Content Crawler is only supported in ALUI 6.5 or later.

Database

- Clustering in WebLogic is not supported when using a PointBase database.
- MySQL versions 4.1.11 and earlier are not supported.
- For MySQL versions 4.1.12 and later, InnoDB tables must be used to enable transaction support.

Supported Configurations for CollabraSuite

- Running SQL scripts using the MySQL Query Browser is not supported.
